Consulting, Engineering & Remediation

PROVIDING COST EFFECTIVE AND INNOVATIVE SOLUTIONS TO COMPLEX PROJECTS

Formed in 1993, EnviroTrac has become one of the leading environmental consulting and contracting firms in the country. We provide cost-effective and innovative solutions to complex projects by combining the right people with the right technologies to meet each project's unique challenges.

“We have made a long – term investment to provide ingenuity through diversity of services while partnering with the Oil & Gas industry”

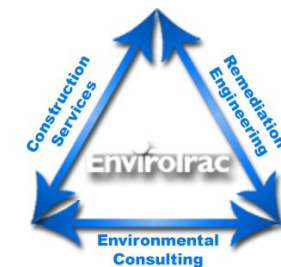

OIL & GAS

EnviroTrac offers a diverse scope of environmental and engineering services to the Oil & Gas industry, specializing in development of wells, exploration, production, regulatory and waste management. Our staff have provided technical and field services in the Appalachia region for the Marcellus and Utica Shale plays and gas asset areas in the Eagle Ford, Haynesville and Permian.

- Mechanical integrity assessments and reporting
- Flowback and production sampling
- Emergency response and spill cleanup
- Waste management (cradle to grave)
- Environmental assessments and remediation
- Pre and post-drill sampling
- Compliance and regulatory mitigation
- Fugitive vapor investigations
- NORM surveys
- Surveillance, metering and calibration
- Development, completion and production air monitoring (H₂S, CH₄)
- Erosion and sediment control inspections.
- GIS mapping
- Spill prevention, control and countermeasure (SPCC) plans
- Water use and water management planning and permitting
- Air sampling programs

SUBSURFACE INVESTIGATIONS

- Gas intrusion and abatement
- Stray gas migration
- Ground water monitoring
- Fate and transport modeling
- Vapor intrusion evaluations
- Aquifer testing
- Bedrock fracture analysis
- Ground water tracer studies
- Geochemical testing
- Geotechnical testing

**we deliver value, quality and innovation
safely to our clients**
