## PROFESSIONAL OIL AND GAS FIELD PROCUREMENT SERVICES FROM EXPLORATION THROUGH PRODUCTION

### Oil and Gas Sample Procurement Services

EnviroTrac provides highly trained hydrocarbon sampling professionals to procure samples from pressurized and atmospheric sample points located onshore. Whether sampling for natural gas, crude oil, condensates, or waters, having experienced and quality driven professionals are critical in obtaining quality results. Our field professionals are trained in proper sampling techniques and understand the production and transportation process to assure samples are procured using correct methods and from the correct sampling points.

All samples are procured in accordance with industry approved methods, including ASTM, API, GPA, and other relevant standards.

- Allocation Samples
- API Chapter 14.1 Natural Gas Sampling
- API Specific Gravity Field Test
- Crude Oil Sampling
- Condensate Sampling
- CO<sub>2</sub> Sampling
- Compliance Monitoring and Testing
- Corrosion (Coupon) Sampling
- Emissions Testing
- Field Flash Testing
- Flowback and Production Sampling
- GPA 2166 Natural Gas Sampling
- Glycol Sampling
- H<sub>2</sub>S & CH<sub>4</sub> Monitoring & Sampling
- High Pressure Sampling
- Hydrocarbon Dew Point Sampling
- PVT Sampling
- RVP Sampling
- Source and Stock Tank Water Sampling

### OTHER PETROLEUM INDUSTRY SERVICES

- Emergency response and spill cleanup
- Environmental assessments and remediation
- Erosion and sediment control inspections
- Gas intrusion and abatement
- Geotechnical Investigations
- Ground water monitoring
- NORM surveys
- Pre- and Post-drill sampling
- Regulatory Compliance
- Storm water and SPCC plans
- Stray gas migration
- Vapor intrusion evaluations
- Water use and water management planning and permitting
- Waste management (cradle to grave)
- Well pad inspections

*“Our self-performing capabilities and expertise deliver high value solutions to our clients”*

**We deliver value, quality and innovation safely to our clients**
